SUMMARY

Introduction

Management Information System (MIS) has been operational under the Directorate General of Family Planning (DGFP) for a long time. Contraceptive Performance, MCH and Reproductive Health service's report are used to be published each month from MIS Unit on the basis of Service Statistics received from the field workers, service delivery clinics and NGOs. Erstwhile Family Welfare Register, however, is the principal source of performance statistics. This report is prepared on the basis of FWA Registers (7th generation). There is a reporting system to collect the information from the field. MIS Reporting Form No. 1 is filled up by the FWA and submitted the same to FPI. FPI fills up the MIS reporting Form-2 by compiling of all the FWAs (Form-1) report and submits to UFPO office. MIS reporting Form-3 (clinical) is filled up by MO (clinic)/ (MCH-FP)/ (FW)/ SACMO/ FWV and is submitted to UFPO office. NGOs of the respective area submit their report to UFPO office through MIS reporting Form-2 and 3 as their requirement. All the reporting Form-2 and 3 are compiled by UFPO office and filled up reporting Form-4 is submitted to District FP Office. District FP Office fills up the MIS reporting Form-5 by compiling of all the reporting Form-4 and is sent to Director (MIS), DGFP. It provides information of contraceptive use status of eligible couples and different types of MCH and Reproductive Health services. MIS performance report is primarily used by different level of program managers and supervisors engaged in implementing the Family Planning and MCH & RH program in the country. Besides, different policy makers, decision makers, donor agencies, Development Partners, researchers and other users also use this report.

Family Planning Performance (CAR related):

Performance reports of October'14 have been received from all the 64 districts of the country. During the month of October'14 total numbers of eligible couples were found to be 26728611 as against 26693537 couples in the previous month. Performances of NGOs are also included in the report as reported by the Upazila Offices. A total of 20892874 acceptors are reported in the month of October'14 as against 20858934 acceptors reported in September'14. The Contraceptive Acceptance Rate (CAR) achieved at the end of the reporting month for six modern methods (Permanent Method, IUD, Injectables, Oral Pill, Condom and Implant) is 78.2 which were 78.1 in September'14. Method Specific Acceptors (Cumulative), Method Specific New Acceptors and Contraceptive distribution by Methods are shown in the summary sheet.

It may be noted that the contraceptive acceptance rate is an estimate, based on the client contact and the status of contraceptive acceptance as reported by the field workers based on the entries made in the register. The Contraceptive Prevalence Rate (CPR), on the other hand, is based on periodic surveys that are made on precise statistical procedures. The acceptance rate is a tentative rate and varies from month to month because of reporting status and coverage. This rate is usually higher than the Contraceptive Prevalence Rate (CPR). CAR is generally used to monitor as a management tool on 'on-going' program performance in the country. It is not so much used to evaluate the programme impact or goals, which is done by periodical scientific surveys.

MCH Performance:

Clarification about the information of summary sheet, table-2 and table-3:

Method Specific Acceptors:

In the summary sheet, Method Specific Acceptors is shown based on the field workers (FWA) visit of the reporting month and also the previous month. These are the cumulative figure which includes previous month's acceptors and reporting month's new acceptors collected by the field workers within their working areas.

Contraceptive distribution by Method:

In the summary sheet, Contraceptive Performance by Method is prepared based on the performance and distribution of the reporting month. These figures are actual performance of the reporting month which is not comparable with the information written in method specific acceptors.

Table- 9, Table-10 and Table-11

Performance showing in the table-9 and 10 is the actual performance of the respective month but the new acceptors showing in the table-11 is may not be the performance done in the same month. It may happen that the new acceptor accepted method in the previous month but field worker shown that case in the next month due to their rounding schedule. So the performance of table-9, table-10 will not be the comparable with the new acceptor of table-11.

Clarification about the information of MCH and Reproductive Health Services:

- Information shown against 'delivery' which done in MCHTI, MFSTC, MCWCs, UHCs & UH&FWCs. This report is collected through the MIS reporting Form-3. So it is not the whole country's delivery records. This report is absolutely excluding the city corporations.
- Information shown against the 'live births (home)' based on field workers (FWA) report. Live births (clinic) are conducted at different types of clinic (MCH, DH, MCWCs, UHC, UH&FWC, NGO & Private clinics). Field workers visit their units monthly and they submit their report in every month.
